

VIJAY VITTHAL SHIPTE

SYSTEMS ENGINEER | DESKTOP SUPPORT ENGINEER | TECHNICAL SUPPORT SPECIALIST

Airoli, Navi Mumbai, India | +91 8828442078 | vijayshipte5@gmail.com | linkedin.com/in/vijayshipte

PROFESSIONAL SUMMARY

Results-driven IT Professional with 2+ years of enterprise experience in Desktop Support, Technical Support, IT Infrastructure, and Windows/Linux System Administration. Recognized with a Certificate of Appreciation from Wipro / Progressive Infovision at HDFC Bank for Q4 FY 25-26 for dedication, technical excellence, and operational performance. Skilled in incident lifecycle management, TCP/IP networking, Active Directory, ServiceNow ITSM, OS deployment, system maintenance, and SLA-driven support. Additional technical exposure includes Cloud Computing, Full-Stack Java Development, Python, and operational automation.

CORE COMPETENCIES & TECHNICAL SKILLS

Networking: CCNA, TCP/IP, DNS, DHCP, Routing & Switching, VLANs, LAN/WAN, Network Troubleshooting

Systems & Operating Systems: Windows 10/11, Linux Administration, Active Directory, OS Deployment, Registry Optimization

Hardware & ITSM: Desktop/Laptop Support, Printer Maintenance, RAID Configurations, Rack Servers, Cabling, ServiceNow, Incident Management, SLA Compliance, L1 Infrastructure Support

Cloud & Virtualization: Cloud Computing, VMware Workstation, Infrastructure Optimization

PROFESSIONAL EXPERIENCE

Desktop Support Engineer L1 | Progressive Infovision Pvt. Ltd.

May 2025 – Aug 2026 | Navi Mumbai, India

- Diagnose, troubleshoot, and resolve hardware, software, operating system, and network-related incidents for enterprise end-users at client location (HDFC Bank).
- Provide L1 desktop and IT infrastructure support to maintain service availability, system uptime, and user productivity.
- Perform system patching, preventive maintenance, registry optimization, and software deployment to improve desktop security and reliability.
- Manage the complete ITSM ticket lifecycle through ServiceNow, including incident logging, categorization, troubleshooting, resolution, closure, and SLA tracking.
- Perform proactive issue identification and hardware maintenance to minimize operational downtime and improve service delivery.
- Received a Certificate of Appreciation for Q4 FY 25-26 for dedication, hard work, technical excellence, and contribution to operational success.

Technical Support Executive | Integrated Active Monitoring Pvt. Ltd.

Nov 2023 – Apr 2025 | Navi Mumbai, India

- Handled multi-tier technical incidents through structured troubleshooting, escalation, resolution, and follow-up processes for business-critical systems.
- Supported enterprise operating systems, hardware endpoints, peripheral devices, and core networking hardware to maintain high availability.
- Performed root-cause analysis and proactive follow-ups to improve incident response efficiency and customer satisfaction (CSAT).

HONORS & AWARDS

Certificate of Appreciation – HDFC Bank (Quarter 4 / FY 25-26). Issued by Wipro & Progressive Infovision. Recognized for consistently demonstrating dedication, hard work, positive attitude, technical excellence, and contribution to team operational success.

TECHNICAL PROJECTS

Employee Management System | Java, Spring Boot, Angular, MySQL

- Engineered a full-stack employee management platform using Java and Spring Boot for robust backend performance.
- Implemented RESTful APIs with CRUD functionality and optimized MySQL database schemas.
- Designed a responsive Angular front end to support efficient data rendering and user experience.

RFID-Based Autonomous Access Door Lock System | Embedded Hardware, Microcontrollers

- Designed and deployed an automated access-control solution integrating RFID technology with embedded microcontroller units.
- Programmed low-level hardware communication protocols for authorization processing and real-time locking execution.

EDUCATION

B.Sc. in Information Technology | Mumbai University | Graduated 2023 | CGPA: 8.8 / 10

CERTIFICATIONS & TRAINING

- Networking Certification (CCNA) – Core routing and switching, IP addressing, subnets, and network security.
- Master's in Cloud Computing – Advanced cloud architecture, deployment, and infrastructure management.
- Full Stack Java Development Program – Enterprise backend and web technology training.
- AI Career Accelerator Program (Be10x) – AI productivity tools, prompt engineering, and operational automation.
